EDUCATION

Northeastern University - D'Amore-McKim School of Business **Boston, MA**
B.S. in Data Science and Business Administration (Concentration: Fintech) *Expected December 2027*
The University of Hong Kong - HKU Business School **Pokfulam Road, Hong Kong**
Exchange Student *January 2026 - May 2026*
Relevant Coursework: Business Statistics, Advanced Programming with Data, Information Visualization, Marketing

WORK EXPERIENCE

Notability **San Francisco, CA**
Quality Assurance Engineer Co-op *July 2026 - Present*
- Execute cross-platform QA testing across iOS, Android, and web applications, identifying functional, usability, and regression issues while partnering with engineering, product, and design teams to investigate defects, validate fixes, and document new B2B processes.
- Expand automated testing coverage by leveraging AI-assisted development to build and improve test scenarios, increasing the scope and efficiency of automated QA.
- Support the Notability Beta Program by responding to beta user inquiries, investigating reported issues, and communicating user feedback to internal teams.

GitHub **New York, NY**
Support Documentation Intern *June 2025 - August 2025*
- Acted as a Product Writer and Tester, publishing 6 articles in Markdown and 3 demo videos in Loom that improved internal adoption of GitHub Copilot for documentation by translating complex technical workflows into clear guidance.
- Collaborated cross-functionally with engineers and support teams across time zones to ensure documentation and workflows were accurate, usable, and aligned with GitHub's product strategy and standards.
- Applied product management principles by conducting end-to-end QA testing, identifying gaps in workflows, and driving improvements via tickets and pull requests, directly enhancing website usability and adoption of AI-driven tools.

Brown Brothers Harriman **Boston, MA**
Infomediary Data Solutions Co-op *January 2025 - May 2025*
- Performed business analysis within an Agile Scrum framework and executed User Acceptance Testing (UAT) with Tricentis qTest for the Infomediary Message Manager ISO20022 project, validating readiness of B2B financial software for clients.
- Conducted User Interface (UI) mapping & test case writing for 1,000+ SWIFT defined industry standards, translating complex requirements into cohesive deliverables using Excel, streamlining implementation for product & engineering teams.
- Drove on-time project delivery by tracking dependencies and milestones in Jira, Clarity, and Confluence, ensuring alignment across engineering and business stakeholders.

TMX/VettaFi **New York, NY**
Human Resources Intern *July 2024 - August 2024*
- Audited and updated over 400 payrolls, I-9s, and offer letters, ensuring 100% compliance with regulatory standards using Learning Management System (LMS), Human Resources Management System (Workday), and Paylocity.
- Coordinated employee training programs, achieving 95% participant satisfaction, and streamlined recruitment processes.

LEADERSHIP EXPERIENCE

Disrupt The FinTech Initiative - Northeastern University **Boston, MA**
Outreach Coordinator *August 2025 - May 2026*
- Drove external outreach by building relationships with leading firms, startup founders, and tech-finance thought leaders through targeted email and LinkedIn campaigns, managing a structured outreach pipeline to secure speakers for high-impact panels and networking events.

PROJECTS AND RESEARCH

Notability Jots *January 2026 - May 2026*
- Co-created a phone-first, AI-powered capture product with a 6-person cross-functional team in a 2-day company-wide hackathon, winning 2 of the event's awards (Grand Prize and Most Proactive) out of 100+ participants.
- Pushed for, designed, and prototyped the home-screen widget in 3 sizes using Claude, created 2 Inky mascots, and mocked up pricing and packaging across Notability's plans to show how Jots fits every tier.

Optimizing Yelp Reviews for Food Businesses to Improve Customer Satisfaction *October 2024 - December 2024*
- Conducted data-driven analysis using Python on Yelp datasets containing 150,346 businesses and 6,990,280 customer reviews, leveraging multiple linear regression, clustering algorithms, and hypothesis testing to determine the impact of 12 key features like ambience & pricing on customer ratings, yielding insights on factors that enhance customer satisfaction.
- Produced actionable recommendations for food businesses based on key findings, suggesting improvements and optimizing service features to attract more positive ratings and broaden customer reach.

Skills: Microsoft Suite, Google Suite, Adobe Suite, Python, Tableau, SQL, R, Canva, Mandarin, Slack
